HCI 300: Introduction to Healthcare Interpreting
Summer/Fall 2013 Course Coming Soon!

Students who missed the introductory course last semester will have an opportunity to take this upcoming course. Learn more about the Healthcare Interpreting Certificate Program by registering for this required introductory course!

This course is designed for bilingual/bicultural individuals interested in exploring the career choice of healthcare interpreter by developing an awareness of the roles and responsibilities of the interpreter in healthcare settings. Topics include:

- Overview and expectations
- Necessary language and cultural proficiencies
- Introduction to the healthcare interpreter profession
- Modes of interpretation in health care
- Professional organizations, standards, and ethics
- The evolving market and trends in the profession and more......

Check out some of the program highlights:

- A one-year, 22.5 unit Career Certificate Program recognized by the California Community College Chancellor’s Office
- Transferable credit
- Prepares bilingual individuals for effective language interpretation and cultural brokering in the healthcare setting

Two Upcoming Sections Offered:
