Collection Development

Your recommendations for books to buy are appreciated. They provide a great way to meet student needs over the long term. Send titles and publication information by form, e-mail, or intercampus mail to your librarian, listed below. The library’s policy on collection development is available on the library website under Information & More.

Your Librarians by Subject Area

Occasionally an area is subdivided, but these are main areas of responsibility for collection development and faculty contact:

**Behavioral and Social Sciences**
Florence Espiritu, 484-8748, EspiriF@arc.losrios.edu

**Business, Humanities**
Connie Ferrara, 484-8040, FerrarC@arc.losrios.edu

**Computer Science & Information Technology, Fine and Applied Arts**
Linda Shoemake, 484-8345, ShoemaL@arc.losrios.edu

**Counseling, Health & Education, Learning Disabilities, Technical Education**
Larry Fisher, 484-8463, FisherL@arc.losrios.edu

**Language, Literature**
Tim Sturm, 484-8500, Sturmt@arc.losrios.edu

**Math, Engineering, P.E./Athletics, Learning Resources**
Kathy Champion, 484-8237, ChampiK@arc.losrios.edu

**Science, Law & Legal Assisting**
Dan Crump, Dept. Chair, 484-8167, CrumpD@arc.losrios.edu

An Information Competency Initiative at ARC

It is pretty easy to Google. The question is will that make a student a competent researcher in the Age of Information? “Information Competency” is of interest to many academicians especially since surveys of students have found that college students routinely fail to define, find, use, evaluate, and present information in responsible scholarly ways. In fact, information competency is mentioned in two separate sections (IIA3b and IIC1b) of the new accreditation standards that have been adopted by the Accrediting Commission for Community and Junior Colleges. Following the lead of other community colleges in the State, the ARC Academic Senate has appointed a taskforce to clarify the concept of information competency and examine how it can be implemented at ARC. If you are interested in serving on the Academic Senate Information Competency (IC) subcommittee, please contact Florence Espiritu (8748) or Dan Crump (8167).

E-Reserves: A New Service

The library is pleased to introduce electronic course reserves, a.k.a. e-reserves. Students have always been able to search the catalog for an instructor’s materials in the print or “in-house” reserves at the circulation desk. Now, in addition to finding books on reserves, students can readily search the library catalog for a professor’s e-reserve collection. Typically this might consist of online password-protected full-text documents, database articles, syllabi, web pages, etc. For complete information, from the Library home page, go to Faculty Services, Print and E-Reserves [http://www.arc.losrios.edu/~library/reserves.html].

Upcoming ITC Workshop. To learn more about e-reserves, plan to come to a workshop with Connie Ferrara on Thursday, April 14, 12:25 – 1:20 pm, in the ITC training room. This semester the library is starting to move all copyright-clear photocopied items in the Reserves into electronic format. Students will just click the title to open the document using any computer.

The web address to remember: http://www.arc.losrios.edu/library
Have a New Course? Consider how it ties in to the library

All new courses submitted to SOCRATES are now required to get a “library sign-off.” For the library sign-off to occur, the course originator has to meet with the library liaison of his/her department. This meeting would involve:

- A review of existing library materials to support the course/program;
- How to recommend new books, periodicals, or audio-visual materials to support a course/program;
- Library services including instruction, course reserves, and interlibrary loan

Naturally, course needs vary. Your library liaison will be interested in discussing your new course so the library is prepared to support it, as needed. For general questions, contact Dan Crump, department chair, at 484-8167.

Library Collection and Use Expands

The library collection continues to grow this year. As always, we welcome your suggestions on materials to buy for student use. From January 2004 – December 2005, over 4,200 new books, DVDs, and other materials were added to the ARC library. In the same time period, 52,999 were checked out (48,505 checkouts, 3,894 renewals). Also new this year, over 1,100 e-books were added directly to the catalog.

Remote access to the databases also continues to grow. Between July 1, 2004 and December 31, 2004, from all of Los Rios, we reportedly had nearly 3/4 million (742,800) requests to access the databases through the district proxy server.

What is WebBridge? WebBridge resides within the catalog. It enables the user to link to online resources based on the search results. To most of us, it looks like a new button. It links to the following bulleted items, and more:

- Periodical research databases, such as InfoTrac and Proquest
- Internet directories such as Librarians’ Index and InfoMine
- Library catalogs - Sacramento Public Library, CSUS

Using WebBridge saves time. It provides searchers with a convenient way to expand a search beyond the library catalog for periodical articles on the same or related topics and books in other area libraries by the same author or on the same subject. How does it work? After entering your search terms in the catalog, simply look for the WebBridge button and click on it for results such as those on the insert.

Have Your Students Delve In at the Research Lab

Have you put library orientations into your semester planning? Why not plan a library assignment and bring your students over for hands-on targeted demonstrations on how to use the catalog and some of the 25 library databases effectively? Also, a skill students need to know and practice is how to think critically to find the best information on the Internet. To schedule class time with a librarian, call 484-8458 or fill-in the online form on the library’s faculty service’s page [http://www.arc.losrios.edu/~library/faculty.html].

Touch Bases with the Databases

Each year the librarians across the district evaluate the research databases that we offer Los Rios students. The current collection linked to the library homepage is the most outstanding in breadth and depth that has ever been offered. Among them, two general databases carry magazine and academic journal articles on a wide range of subjects (InfoTrac: Expanded Academic Index and Proquest Research Library). Students often use CQ Researcher and Proquest’s National Newspapers, and Psychology Journals. In the last year, we have added the New York Times Historical Newspapers and the History E-Book Project as well as Rand California for statistics and multiple business databases. Last, but certainly not least, it is exciting to offer the entire Oxford English Dictionary and its companion resource, the Oxford Reference Online Premium.

What does a source like Oxford Reference offer? This one database contains numerous dictionary, language reference, and subject reference works published by Oxford University Press. The full spectrum of subjects covered include language, literature, history, mythology and folklore, science-technology, medicine, health, accounting, finance, law, art & architecture, classics & the ancient world, performing arts, religion & philosophy and politics & social sciences. It is a phenomenal learning tool.

Have some fun searching for current articles in the databases about your discipline. And – here’s a suggestion – next collaborate with library staff to link to them from e-reserves!
Notice that if you have your students use WebBridge to find online sources, they will not have access to a general Internet search engine. This is intentional! We would like students to get out of their comfort zone. Remember to experiment with the WebBridge button the next time you do a search in the catalog. One small disclaimer is, as with many aggregating tools, not all categories are relevant, depending on the search.

To go directly to the catalog, go to http://lois.losrios.edu
